Job description

Senior Solution Architect -Packet Core

What does your future look like?

We are on the brink of the Networked Society - a technology revolution that will change the world for good through instant global connections and expanded freedom and opportunity.

Ericsson is a world leader in the rapidly changing environment of communications technology – providing equipment, software and services to enable transformation through mobility. Headquartered in Stockholm – Sweden, Ericsson is a publically listed company with more than 115,000 employees

More than 180 countries use Ericsson equipment and more than 40 percent of the world's mobile traffic passes through Ericsson networks. Technology is at the heart of our business. Ericsson engineers, researchers and scientists around the world are working on what's next in information, communications and telecommunications (ICT).

A connected world is just the beginning. Your passion determines what comes next! Apply your ideas and insights to empowering people, business and society.

Come and discover what makes **YOU + ERICSSON a powerful combination**

We welcome the opportunity to meet you!

Job Summary

We are now looking for a Solution Architect (**Packet Core**) to work directly with our key customers. In this role you will be responsible for analysing, designing and developing commercially viable end-to-end technical solutions for the telecommunication space.

What You'll Be Doing

- Work with customer to understand current systems and design technical solutions that meet the business needs
- End to End Solution experience with a prime focus dealing with delivery and solution design
- Ensure designed systems are scalable, robust and cost effective, requiring minimal maintenance and can be easily evolved to meet future business needs
- Understand system workflows to produce technical solutions
- Assist with product and delivery teams to ensure designed solutions are developed and deployed effectively to meet objectives
- Work within strictly defined timeframes and provide high level guidance on size and scale of work required for solutions
- Engage business stakeholders in understanding potential technologies capabilities
